Devops + TOOLS

For string code
Devops activities done smoothly.

Tool 4 → MAVEN

JAVA APP → CI/CD → Container → Sonar

food
water

dependent
hierarchy.

10KB → 100MB file
5MB

Dependent

1 code on other.

MAVEN

100KB [Bigger code] } Repository
GIT HUB → 100KB

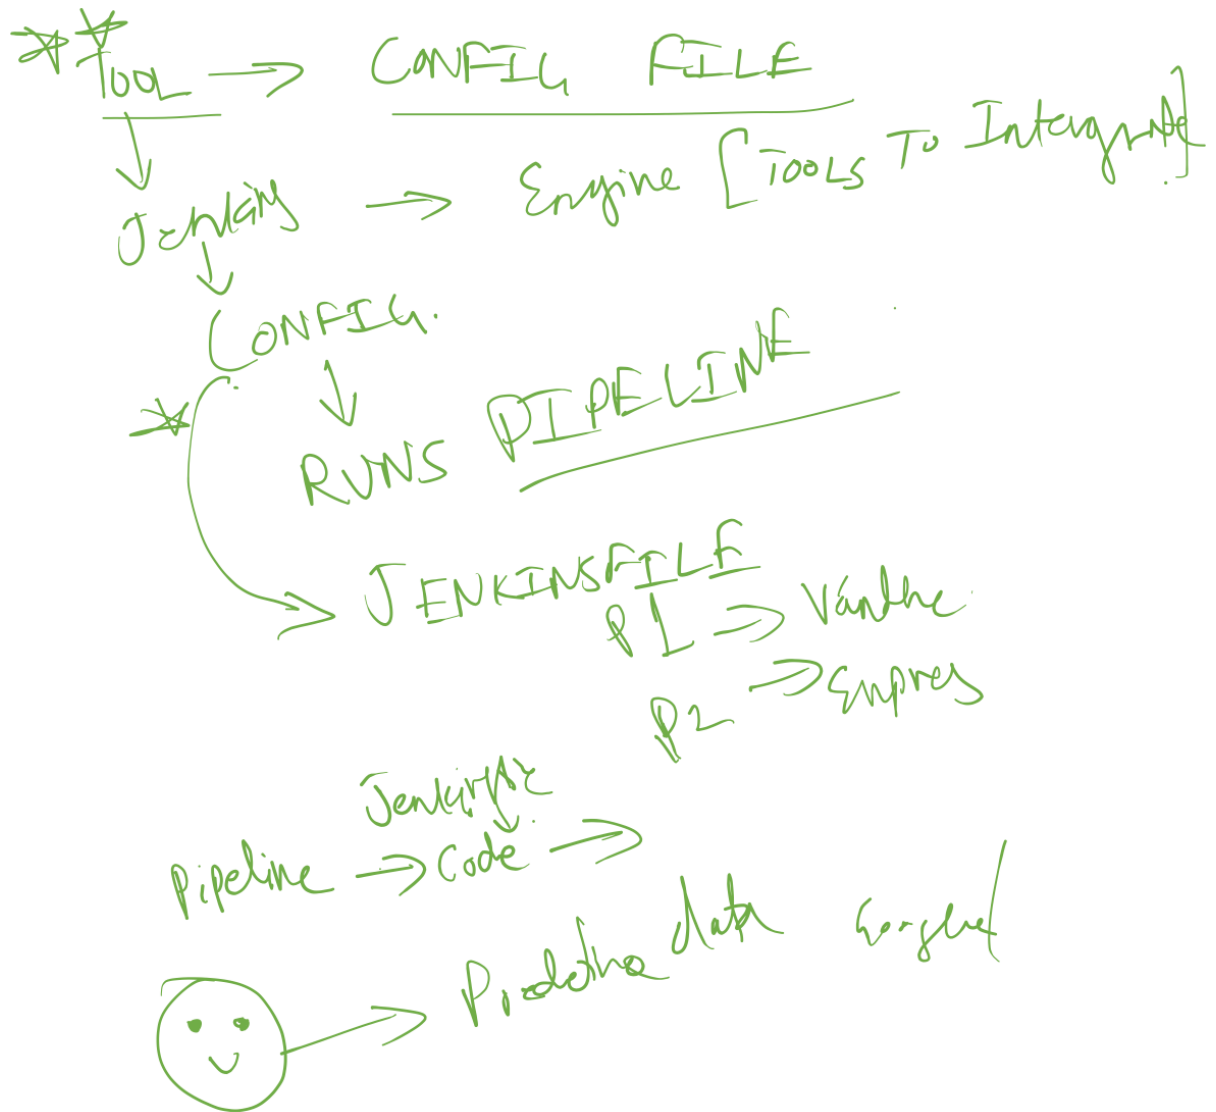

Tool 5 JFROG [Storage] → JFROG
→ smaller files [Binaries]

Automation

GRAFANA → see the Data.

Devops is all about CONFIGURATION

Jenkinsfile → C

Pipeline. → CI/CD → Jenkins → Tool To BIND

GITHUB → PROJECT 1 → hello.java
Test.py
RUN.sh
Sep 2: Jenkinsfile → Jenkinsfile

Sample → CI/CD

Why my students are getting only product based?

Why are you here?

What package you are

Parents happy

You money, space.

Business → Internet → Admin

★ Pipeline / Jenkins

4 days

Gitlab / Jenkins / Sonar / Jenkins / Maven / Docker / Container

groovy

Jenkinsfile

Pipeline
